#### MY DREAM.

(To the Editor Interior Journal.) Being transported in a dream to a beautiful city situated in the heart of finding that the train I contemplated leaving upon was some two or three hours late, I concluded to take a stroll about the city. Leisurely walking along I suddenly found myself in front of a very imposing structure surrounded by spacious and most beautiful grounds. Above the entrance or gateway to these grounds was this sign in large letters-"Asylum for the Insane." Never having visited an institution of this sort and finding my time dragging heavily upon my hands, I concluded to go in and look through the building. It may act as executor, administrator, trustee, &c., as fully as an individual. But having very little education there were but few fields for me to work lin. in such a calling. As there was, however one sect or denomination which required no special qualifications for its preachers, I became one of their number and took a pulpit. I was not long engaged in my new

work before I discovered that one of two things was indispensable to a successful ministry: That a man must either be a scholar to enable him to probe the deep and difficult teachings of the plan of salvation under the law; or else he must be imbued with grace that by the aid of the Spirit he might read the Hammock, F. W. Dillion, Crab Or Scriptures between the lines and get the beautiful truths contained therein, but which are almost smothered out by the cold letter of the word. As I possessed neither of these qualifications I foresaw that it would be only a question of a very short time before I would have to give up my charge. Being, however, possessed of a determined will power, and an unusual amount of pride, and knowing the proneness of the human race to lose sight of the deeper; and more enduring truths for the lighter things of life, I began to puzzle my of about 1,000 fish last Monday and not mind to discover something of a secular a good day for tishing with hooks einature to distract my congregation's ther. and perfect safety to deposition.

I have quite a number of FARMS for sale of the V I have unite a number of FARMS for sale of the very heat B un-tirars Lands in Lincoln county.

These Farms are all well improved and good rich lands, running in size from 30 to 500 Acres.

Considering their locality, their richness and feathing of said, the convenience of turnpikes and feathers that bring markets right to our door, they are cheaper than the Lands of any other county in the State. There is scartiely a Farm in the county to over smilles from a detail.

the State. There is scarcely a Farm in the county over a miles from a depet.

The county is checked with tumpises running mesery direction. There is not a public road entering the county seat that is not Macadamized. We have the Know tile Branch of the L. & N. R. R. dividing the county from Rasis to Wast and the C. S. R. R. trum North to South; the K. C. R. R. trem this place in Cincinnati, crossing the C. & O. at Winchester, giving full access to the markets of the whole world. Besides, we have three large From Mills in the county that give is a market for all our grain right at home, and the developor all our grain right at home, and the develop-nent of the mountain regions at Eastern and outh-eastern Kontocky by sullmosts and the outet South by railroads has created such a demand or all kinds of cerealy and proxender that we can carriedy retain enough for home consumption. The people are prosperous, generous and kind, believing in Christianity and editoration. There

is not a neighborhood in the country but has a great church and school beave.

Stanford, the country seat of Lincoln, is a prosperson little city of about 2-500 inhabitation and is the great decreasy from the North and North east South and from the Northways to Southeast, and standing or it does gaving right into the banout of the undevrloped mountains of Southeastern Kenticks. one of the underringed mountains of Southeastern Kentucky backed up by the whole Blue Grain agrow at the State with railreads running through the all points of the compass makes it naturally one of the best in sted flows in the South for manufactures and other enterprises of magnitude. Water Works are now being agitated and right about the two about three fourths of a mile there could be erected Water Works with very little contribute and water than continuous in the contribute and water works with very little contribute and water works. there could be served supply a city of rancou in habitants with the purest and best water in the world. Curlittle sity has been newly rebuilt in the last few years and its business houses and re-

idences will a minute with larger cities of greate pretensions. Our merchants and tradesion as idences will compare with larger cities of greater pretensions. Our merchants and tradesmen are all presuperous and deing well. We have two banks with a capital stock of Spotoson that are properties and in a good condition.

We have spiesoid schools. We have a Female College, a large break building, with over mo pupils in attendance and under the principaliship of Prof. J. M. Habhard, is an a floorishing conditions. We also have a Seminary that is a good whool with Prof. B.F. Blassman at its head We have one of the less Public School buildings in this section of the State, with over one pupils in attendance, and with other good private schools, you see our school facilities are everling.

We have elegant church buildings tepresenting very denomination, with a full corps of ministers from a lass taken and are doing a better business but any class of men in the city.

I have tried to make this statement as facts.
